Size:

2 4'x8' OG-300 Solar heat collectors with 80 gallon hot water storage tank

System Specifications:

*AET tanks and panels
Goldline differential temp. controller with sensors,
Taco pump*

Project Description:

New Construction of Carey Hilliards Family Restaurant; Sela Energy and its subsidiary Georgia Solar Solutions, provided solar hot water system and ensured that the client received the necessary tax credits for project financing. The hot water is used for dishwashing, food preparation, and washing the restaurant kitchen; a gas powered back-up system was installed as well.
